**Risks** First of all The Purchasers understand that participating in Token Sale may result in financial losses! Nothing in the Service, in the Terms or in any statements or information contained on the Site at any moment, or in any means of communication of the Service (including but not limited to the publications in social media, as well as the statements or declarations made by inter alia the representatives of the Service, notwithstanding whether they had been made personally or on behalf of the Service), notwithstanding the time of their occurrence, shall be construed as the guarantee of gaining profit or benefit in any other form. Venture investments are highly risky. Buying CHIPS tokens is a considerable risk. The investors and managers incur the following risks: inherent risk, loss risk, theft risk, compliance risk, risk of misconception. Once the investor sends cryptocurrency to one of the fund's wallets, the investor confirms understanding and accepts the risks and potential irreversible losses. The fund's managers only risk losing their own personal investments. The risks highlighted below are worth considering but they are not exhaustive:

- *Risks relating to insufficient secondary market liquidity.*

Even if digital tokens are tradable in a secondary market, in practice, there may not be enough active buyers and sellers or the bid-ask spreads may be too wide. Consumers may not be able to exit their token investments easily. In the worst case scenario where no secondary market develops, a consumer may not be able to liquidate his token holdings at all. The exchanges or platforms that facilitate secondary trading of digital tokens may not be regulated by a regulator in your jurisdiction

- *Risks relating to highly speculative investments.*

The valuation of digital tokens are usually not transparent, and highly speculative. Where digital tokens do not hold any ownership rights to the seller's assets, the digital tokens would not be backed by any tangible asset. Such tokens would be merely speculative investments and their traded price can fluctuate greatly within a short period of time. There is a high risk that a consumer could lose his entire investment amount. In the worst case scenario, the digital tokens could be rendered worthless.

- *Risk related to cryptocurrency values.*

The Purchaser understands that there may be serious risks connected with cryptocurrency, such as heavy fluctuations of virtual or actual currency values, which in turn may lead to loss of currency over short or long periods.

- *Risks of money laundering and terrorist financing.*

Funds invested into investment schemes involving digital tokens are prone to being misused for illegal activities due to the anonymity of transactions, and the ease with which large sums of monies may be raised in a short period of time. Consumers would be adversely affected if law enforcement agencies investigate any alleged illicit activities related to the token investment scheme.

- There is no guarantee that the invested funds will be safe or will lead to profits.

- All of your investments might be lost!

- The investments are not insured and there are no private or government insurance representative that the investors can address.

- There is no guarantee of the token's liquidity in the future.

There is a risk that the tokens won't be in demand. There is also no assurance that the market price of the CHIPS Tokens will not decline below the original purchase price. The Purchase price may not be indicative of the market price of the CHIPS Tokens after they have been made available for trading on a cryptocurrency exchange.

- There is a risk of theft of all the fund's assets by fraudsters or hackers.

- There is a risk of appearance of regulatory or legal restrictions, which can complicate the fund's work or stop it altogether. The RealCasino or the CHIPS Tokens may be affected by newly implemented regulations Cryptocurrency trading is generally still unregulated worldwide, but numerous regulatory authorities across jurisdictions have been outspoken about considering the implementation of regulatory regimes which govern cryptocurrency or cryptocurrency markets. The RealCasino or the CHIPS Tokens may be affected by newly implemented regulations relating to cryptocurrencies or cryptocurrency markets, including having to take measures to comply with such regulations, or having to deal with queries, notices, requests or enforcement actions by regulatory authorities, which may come at a substantial cost. Further, it is difficult to predict how or whether governments or regulatory authorities may implement any changes to laws and regulations affecting distributed ledger technology and its applications, including the RealCasino and the CHIPS Tokens.

RealCasino may also have to cease operations in a jurisdiction that makes it illegal to operate in such jurisdiction, or make it commercially unviable or undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction. In scenarios such as the foregoing, the utility, liquidating, and/or trading price of CHIPS Tokens will be adversely affected or CHIPS Tokens may cease to be traded.

- There is a risk of a failed investment, which the fund might proclaim unprofitable and write off as a loss.

- There are technical risks (e.g. connected to Ethereum) that might cause the fund to be unable to make a transaction of the profits.
- There is a risk of cryptocurrency, fiat currency or investment devaluation.
- There is a corporate risk of losing control over shares of the portfolio startup. Hence, User therefore understands and accepts that the transfer of cryptocurrency to RealCasino may result in a total loss and that the Purchaser shall not have any claim whatsoever to reclaim any cryptocurrency lost. The Purchaser acknowledges and understands that the Tokens have no warranty whatsoever, expressed or implied, to the extent permitted by Applicable Law and accordingly that Tokens are purchased on an "as is" basis.

By sending currency to one of our published addresses or Bank Accounts you are agreeing to our terms and conditions and specifically agree:

- You understand and agree the investment is high risk
- You have checked that you are legally entitled to purchase the token within your jurisdiction
- You understand the risks involved in managing a cryptocurrency wallet
- You fully understand the token is purely a utility token that can be used at RealCasino. The token is not linked to any security in any way - cash, assets or future dividends
